

ExtractAire™ Baffle Filter

Model: **BAF**

ExtractAire™ Baffle Filters are engineered for use in Commercial Kitchen Ventilation hoods requiring a filter that is Listed to the UL 1046 Standard.

The ExtractAire™ Baffle Filter design and construction provides reliable fire protection and grease extraction for lighter duty Commercial Kitchen Ventilation environments.

ExtractAire™ Baffle Filters are available in various sizes ranging in heights from 12” to 20” and widths from 16” to 25”.

BENEFITS AND FEATURES

- GREASE EXTRACTION EFFICIENCY:** 18% @ 8 microns
- ROUND BAFFLE DESIGN:** Provides an effective fire barrier and is easy to clean
- ALUMINUM CONSTRUCTION:** Provides corrosion resistance and is economical
- STAINLESS STEEL CONSTRUCTION:** Provides corrosion resistance and added durability
