

ExtractAire™ Cartridge Wash Rack

Model: **CRW**

The ExtractAire™ HVC and HVCMS Filters are easily removable for cleaning. The adjustable diverter choke is also removable, allowing total access for hand washing of both the inside and outside of the cartridge. There are no sharp edges or tight openings for fingers to become trapped or injured as in the typical baffle or other types of filters. The ExtractAire™ HVC and HVCMS Filters have been designed to fit into most commercial dishwashers. When the ExtractAire™ HVC or HVCMS filters are removed from a Streivor exhaust hood, the entire hood plenum is accessible for easy cleaning.

Streivor™ Air Systems manufactures a heavy duty ExtractAire™ Cartridge Wash Rack (CWR) that fits into most commercial dish washers. The ExtractAire™ CWR is fabricated from 16 gauge stainless steel and 5/16 type 304 round bar. The CWR measures approximately 20" x 16" x 4". The CWR accommodates up to three 20" long ExtractAire™ Cartridges at one time. This protects the environment by reducing water usage, energy consumption, and the use of harmful chemicals.

BENEFITS AND FEATURES

- EASY CLEANING:** ExtractAire Cartridges are easily removeable for quick cleaning
- HEAVY DUTY CONSTRUCTION** Guarantees long life
- HELPS THE ENVIRONMENT** Reduces water usage and need for use of harmful chemicals.
